Experience, Above All™

**ARMSTRONG ARCHITECTURAL SPECIALTIES ANNOUNCES A PRICE INCREASE ON
METAL CEILINGS & WALLS SYSTEMS PRODUCTS**

Geographic Coverage: United States, Canada and Latin America
Commercial Distributors and Contractors

LANCASTER, PA – Effective Monday, May 18, 2026, Armstrong Architectural Specialties will implement a 7% price increase on all metal-based products, including MetalWorks, suspension systems, hanging kits, trim, clips, and other metal accessories.

This price increase is the result of steel and aluminum markets that continue to face significant upward price momentum, resulting in increased metal input costs. Armstrong will continue to monitor market conditions and will communicate additional changes as needed.

Please note the escalation table on all custom and premium quotations will apply.

For longer-term future quotes, we suggest the following pricing for 2026 and 2027:

- An additional increase of 5% for quotes on or after August 3, 2026
- Another additional increase of 5% for quotes on or after February 1, 2027

This Pricing Bulletin and the above guidance are based on current available information and conditions. Consistent with past practices, we will provide updated pricing information in the form of list pricing, bulletins or other notifications, as appropriate, as additional information becomes available. As always, you remain free to quote, price and contract at whatever pricing you may choose in your discretion. Please always feel free to contact your local area manager with any questions or requests for assistance.

As always, we appreciate and thank you for your business.

Mike Winters
SVP, Architectural Specialties and Corporate Development
