

April 17, 2026

**To: U.S. CertainTeed Architectural (Ceilings) Customers**

**Subject: Transportation Surcharge starting May 18, 2026**

Due to the rapid spike in fuel prices over the past three months, CertainTeed Architectural will implement a **Transportation Surcharge** to partially offset continued freight inflation impacting our shipments. The **Transportation Surcharge** will be determined based on a rolling 30-day average of the U.S. #2 Diesel Price using the chart below and will be reviewed monthly. Any update to the surcharge amount will be communicated to customers in advance and will take effect the following month.

Effective **May 18, 2026**, the Transportation Surcharge will be **\$360 per full truck shipment of Acoustic Ceiling Panels and Suspension System products**. For Multi-Stop and Pooled Truck orders, the surcharge will be applied on a weighted basis. The Transportation Surcharge will appear as a separate line item on order confirmations and invoices.

30 Day Average = 5.37	
Average # 2 Diesel Last 30 Days	Surcharge Per Invoice
3.26 - 3.75	\$ 120
3.76 - 4.25	\$ 180
4.26 - 4.75	\$ 240
4.76 - 5.25	\$ 300
5.26 - 5.75	\$ 360
5.76 - 6.25	\$ 420
6.26 - 6.75	\$ 480
For each additional 0.50 increment above 6.75	\$ 60

We appreciate your understanding and continued support of CertainTeed Architectural as we navigate ongoing freight cost volatility.

Sincerely,

**Matthew B. Cribbs**
