Dear Valued Customer,

Subject: Pricing Update – Effective May 11th, 2026

We recognize that we implemented a price increase just one month ago, and we do not take this second adjustment lightly. Unfortunately, we are compelled to act again. A new 10% tariff on products manufactured from US-origin steel took effect April 6th, compounded by additional freight cost increases that have hit simultaneously. Together, these pressures leave us no choice but to make a further adjustment.

Effective for **shipments beginning May 11th, 2026**, pricing on select Structa Wire products will increase by approximately **5% on select Structa Wire products**.

Orders shipping prior to May 11th will be invoiced at current pricing. **Orders scheduled to ship on or after May 11th will reflect the new pricing structure.**

We remain committed to providing reliable supply, consistent product quality, and the technical support our customers rely on every day. We value the partnerships we have built together and appreciate your continued business.

Your sales representative will be available to review pricing details and answer any questions you may have.

Thank you for your continued support.
