

## Price Increase Announcement April 1, 2026

January 7<sup>th</sup>, 2026

Valued Customers:

Quikrete Cement remains committed to delivering consistent, high-quality materials and reliable service across the markets we serve. While we continue to experience rising operational costs at our plants and terminals, we also recognize the importance of taking a measured approach to pricing in today's economic environment.

To help offset these cost increases while continuing to support your business, we are implementing a price adjustment in our East Region markets.

**Effective April 1, 2026, Cement Products in the East Region Markets will increase per the details below.**

- **Packaged Portland Products will increase by \$0.30 per bag.**
- **Packaged Masonry Products will increase by \$0.25 per bag.**
- **White Cement will increase by \$1.00 per bag.**

We will continue to communicate future pricing adjustments proactively.

Delivered prices may be adjusted at the time of shipment in connection with changes in freight rates, taxes, environmental, and fuel costs. All sales are subject to the Company's Standard Terms and Conditions.

We look forward to supplying your cement needs. If you have any questions or require additional information, please do not hesitate to contact your Market Manager or me directly.

Sincerely,

Katie Nelson  
Vice President of Sales  
Cement East Region

Adam J. Haly  
Cement Sales Director  
Sunshine State Sales District
