FRY REGLET

September 16, 2026

Dear Valued Customers,

At Fry Reglet, we are committed to providing you with the highest quality architectural aluminum extrusion and trim products, along with the level of service you have come to expect from us.

Over the past several months, we have absorbed significant increases in the cost of aluminum, compounded by the impact of Section 232 tariffs and geo-political instability. To continue delivering the quality and reliability you depend on, we must implement the following price adjustments:

Effective Monday – October 19, 2026:

- Millwork profiles: 9.2% increase to *list price*
- FCP profiles: 10% increase to *list price*
- Drywall profiles: 10% increase to *list price*
- Plaster profiles: 10% increase to *list price*

We recognize that any price adjustment affects your business, and we do not take this decision lightly. Please note that most of our accounts have an established discount structure in place, and as a result, the net impact of this increase on your actual invoice pricing will be less than the percentages listed above. For example, if your account has a 30.0% discount off list price and your list price increased 10.0% then your account would only see a 7.0% net increase to the purchase price. Your sales representative can provide you with the specific, account-level pricing impact so you can plan accordingly.

We remain fully committed to supporting your projects with the quality, lead times, and service that have defined our relationship. If you have any questions about how this increase applies to your account, please do not hesitate to reach out to your Fry Reglet sales representative or contact us directly.

Thank you for your continued partnership.

Sincerely,

Robert Ward
