Interior/Exterior Building Supply Corporate Offices  
727 S Cortez St  
New Orleans, LA 70119

Dear Kelly Burke,

Diesel fuel prices have reached record levels. The U.S. Department of Energy (DOE) national average on-highway diesel price was \$6.529 per gallon for the week of September 21, 2026, above its 2022 peak and well above the level reflected in our May 2026 price adjustment. We are no longer able to absorb that increase on prepaid freight.

Effective for orders shipped on or after October 1, a freight fuel surcharge of \$100.00 per shipment will be added to all prepaid freight orders. The surcharge:

- applies once per prepaid shipment, regardless of weight;
- will appear on invoices as a separate line item;
- will be reviewed on a periodic basis and will be adjusted as diesel prices warrant.

Collect and third-party-billed orders are not affected and will not incur a surcharge.

We appreciate your continued partnership and understanding. Please contact your Valto Customer Service or Sales Representative with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Matthew Shields", with a stylized, cursive script.

Matthew Shields
