Price Increase Announcement – Effective November 30, 2026

Dear Valued Customer,

Effective November 30, 2026, CEMCO will implement a price increase on all steel-based products across all markets.

Domestic steel mills have been running behind schedule due to supply constraints caused by the limited availability of imported steel in the United States. As a result, mills continue to raise prices month-over-month.

In response, CEMCO will increase prices on all steel-related products shipped on or after Monday, November 30, 2026. This will be our 12th announced increase in 2026, an unprecedented development in our 52-year history.

This unanticipated industrywide trend has affected both forward-looking pricing and to a greater degree our committed projects quoted in the months preceding this recent price surge. This increase is necessary to offset the rising cost of steel, the primary input for our core product line.

In addition, rising inbound and outbound freight costs, together with price increases for packaging, parts, and other industrial supplies, continue to pressure our cost structure.

Updated price sheets will be available from your sales representative during the week of November 23, 2026.

We appreciate your continued support and understanding as market conditions continue to change.

Sincerely,

CEMCO Sales Management Team
